Oil Spill Kits

The Waterway Recovery Group kit includes an oil spill kit.

The kit is supplied by Spill Kits Direct and contains:

- 25 Oil pads
- 4 Oil socks, 125cm
- 1 Oil cushion
- 1 Flow stopper ready mix slab
- 1 pair goggles
- 1 pair Nitrile gloves
- 1 Disposable bag
- 1 Plastic tie.

Precautions:

Oil and other hydrocarbons are an irritant to skin and eyes. The kit contains gloves and goggles for use when clearing up spills and disposing of waste.

Oil pads; Absorbs hydrocarbons not water and is ideal for use when spills have spread over large areas, in settling ponds or waste water lagoons and for garage and vehicle maintenance areas and in fuel/oil dispensing areas. The pads are laid over the oil spill to absorb the oil and the light blue material turns dark when saturated.

Oil socks; Absorbs hydrocarbons not water. Direct Socks can be used to place around oily machinery to prevent leaks from spreading and causing hazards, to contain, control and absorb spills and to provide temporary bunding around drums.

Oil cushions; Absorbs hydrocarbons not water. Suitable for a variety of applications including on major spills on water and on land and can be used in sumps and bilges and under machines. Ideal during maintenance on valves and glands and to protect expensive parts and keep them off the floor.

Flow stopper mats; They prevent oils and chemicals flowing through storm drains into controlled waters and are resistant to oil, water and most chemicals. To use, peel off cover and tread onto drains and the product gives 100% seal even on damaged drains and rough surfaces.
